

PRODUCT DESCRIPTION

Powertec BS900 Bandsaw

The Powertec BS900 BandSaw is an essential tool to carry out wood-working jobs. It is fabricated with top quality metal and plastic and can cut and saw up to 9 inches. This BandSaw operates through a ½ Horse Power induction motor. It contains the fine Aluminum casted desk as the perfect cutting surface having area of about 138 sq.inches. An individual blade guard system, the tilting desk surface, and the window to view and track the blade add to the versatility of the product.

Features:

- Cutting depth adjustment through blade guard system
- Angled Cutting capability via 0 to 45 degree tilting desk surface
- Easy tracking and aligning of blade through window feature
- Blade Tension Lever which allows to replace the blade in a simple way
- Exceptional and persistent 2.5A motor with ½ Horsepower for carrying out wide range of wood-working jobs

Pros:

- Powerful and durable motor
- Solidly built product frame
- Quick adjustment capabilities
- Accurate angle execution

Cons:

- Lack of Dust collecting device
- Difficult to operate with thin blade

Customer Opinion:

The customer opinions declare that the device is:

- A well-built tool for resawing purpose
- Ultra-modern and supportive surface tilting ability
- Highly favorable to carry out circular cuts

- Lacking a demanding feature of dust collection

Even the device is missing various small features and capabilities, it is for sure that the Powertec BS900 BandSaw is the complete and flawless tool for resawing and wood cutting jobs. So, what else is needed in spite of a fully packaged tool in highly inexpensive rates?
