We have a flexible warranty system which varies between four months for cockroaches, eight months for ants and spiders, and more than a year for termites and bugs. We provide you with free inspections after the warranty period expires. There are no extra costs when the warranty period is in action.

Termite Removal Services in Melbourne:

Termites (commonly known as white ants) are one of the most destructive pests in the country. They can make millions of dollars loss to homes and different workplaces and organizations throughout the country and state every year.

According to CSIRO, every 1 in the 3 houses or workplaces are being affected by termites whether it's an economic life of the aspect, or the professional one. Termites are found in all over the city and state, they are often remained undetected until damage is discovered by chance. This damage cannot be covered by most of the insurance companies across the city.

Termites could be very extensively hazardous causing extensive damage to the structure of a building and go for years undetected without a monitoring and inspection regime. Over 100,000 homes suffer from termite attack each year in the country.

Our services provide a number of different methods for protecting properties, houses and workplaces including examining and keeping under surveillance the termites with all necessary equipment and chemicals. These chemicals, equipment and requirements include bait stations, liquid chemical barriers and physical barriers that are being installed during construction.

Our Termite Treatment Plan will provide the best solution for the pestilence on your property or organization, accessing all these necessary components like tracking, baiting and a liquid chemical barrier in order to demolish and get rid of the termites efficiently.

The termite experts in our team are very brilliantly skilled. They all are trained to use the very new technologies that help in the fulfillment of the best services for the customers and clients. In addition to this, the experts and technicians are backed by 90 years of global experience in pest control.
