

PRODUCT DESCRIPTION

JET JWBS-14DXPRO Resawing Bandsaw

JWBS-14DXPRO, the one of the exceptional Resawing BandSaw designed by JET Tools comes up with highly effective performance. Its sturdy machine and fascinating grip makes it the most desirable product for resawing. The classic product has dimensions of 29x28x77 inches having cutting potential of about 12 inches. This BandSaw is assembled with a 15x15 cast iron worktop for the purpose of wood resawing. There are two speed modes of this machine, high and low for smooth resawing of thick and thin wood stocks respectively.

Features:

- The cast iron cutting surface which makes it more substantial
- Dedicated portion for collecting dust particles
- Heavy-duty motor having 1-1/4 Horsepower
- Lasting blade of 105 inches fixed with a fine ball-bearing to reduce friction and assure stability.
- The best and effective feature of poly-v belt drive system in addition with two speed modes

Pros:

- Sturdy motor and rigid framework.
- Matchless security capabilities.
- Potential to deal with huge wood stocks.

Cons:

- Requires a highly experienced wood-worker for execution.
- A little expensive than other competent products.

Customer Opinion:

According to the customers, the JET JWBS-14DXPRO is:

- Extremely flexible and easy to regulate
- Supreme and powerful regarding its working and maintenance

So as we see, the JET JWBS-14DXPRO Resawing BandSaw can be considered the best to work with. It has all the necessary features that are needed for a Bandsaw to be perfect. Although, there are some pitfalls of the device claimed by various wood-workers but, the agility of the product cannot be denied at all.
