

PRODUCT DESCRIPTION

Powermatic PWBS-14CS Resawing Bandsaw

The PWBS-14CS has crashed the market with its highly extensible performance and an adorable look. The product is fabricated by the one of the top-most tool manufacturing companies, i.e. Powermatic. The sturdy appliance for wood-working jobs has 1.5 Horsepower motor along with poly v-drive belt configuration. The BandSaw has dimensions of 20x34x68 inches in addition with a worktop plane of 30 sq-inched surface area. This worktop is constructed with high quality cast iron. Dust extraction is easily possible for better execution. A 60 Watt adjustable lamp is also situated with the tool for clear vision of blades and cuts while carrying out different resawing jobs.

Features:

- Rigid cast iron worktop with rotating capability
- Heavy-gauge to reduce the vibration and making the tool more stable
- Lightening system to produce ease for cutting tasks
- Handle assembly with three different features of 1) Relaxed Tension 2) Full Tension 3) Full Release. This variety increases blade life

Pros:

- Induction motor with welded steel reduces vibration effect
- Excellent Dust Cleaning feature
- Voltage conversion capability
- Long-lasting motor

Cons:

- Ineffective when dealing with hard material
- Difficult to align drive belt
- Time consuming setup

Customer Opinion:

- A well-built Bandsaw
- Highly recommended due to its precision
- Exceptional design and work quality
- Initialization and setting up the tool takes time
- Terrific dust removal through blower and nozzle feature

It is for sure that the PWBS-14CS Resawing Bandsaw designed by Powermatic has all-in-one hallmarks that make it the most commending tool for achieving cutting and crafting goals. However, there are minute drawbacks but they don't compromise the product quality.
