

PRODUCT DESCRIPTION

Skechers for Work Women's Sure Track Athletic Boot

One of the best shoe manufacturing companies is the Skechers Footwear. In 2015, the company released an exceptional footwear namely, Sure Track Erath Athletic Lace Slip Resistant Boot. The footwear is designed for women who use to prefer Tracking, Jogging, and multiple sport activities. The item carries model number 76576 and weighs just not more than 14 pounds. The product dimensions are 12.1 x 7.7 x 4.5 inches. Moreover, if taking a look on its material, the boot is built up from pure synthetic and high quality leather. There isn't compromise on the product's material as it is of imported quality. As the name implies, the boot is slip resistant. What makes it slip resistant is the premium rubber sole having such a texture that increases its grip on the ground. Additionally, the sole consists of a small heel of approximately 1.25 inches and what makes the foot tightly fit in the shoe is the lace closure.

Why we like it:

- The shoe is completely relaxing and can be had on for a long time, even for the whole day.

- The sole grip is very well built that makes it totally slip resistant.
- The simple design of the boot is completely adorable.

Our Verdict:

The simply best footwear that one can have and we suggest this product for the women who use to take part in different sports and activities like jogging, cricket, tracking, etc. You will definitely not be disappointed by the product as it is manufactured by the popular company, Skechers.
