

The Apple iPhone 12 Blueprint Unveiled Facing Another Disclosure

Dated: 07/Sep/2020

It has been an alarming situation for Apple Company regarding its upcoming iPhone 12 range's design leaks as these disclosures are occurring constantly causing upsets for the product.

In a latest report by the Fast Company, it has been disclosed that the Apple iPhone 12 Pro will be released carrying the low level 5G potentiality and its companion, the Apple iPhone 12 Pro Max shall be fulfilling the premium 5G package in a very few number of countries across the world.

One of the Apple Company insiders, Mr. Jon Prosser has said that Apple is ready to expose the press orientation for its new products which it has planned to release in the near future. This orientation shall take place on 8th of September. This wouldn't be considered as the day for the launch of Apple iPhone 12, as the company has already revealed that the iPhone 12 shall face delay for its release and they haven't announced the final date for its launch. Although, on their

official YouTube channel, Apple had uploaded a teaser for the event in the early September, but there wasn't any clear announcement with regard to the iPhone 12 launch.

The Fast Company has also reported that the Apple Company has intended to release the mm-Wave premium 5G compatible iPhone 12 Pro Max gadgets for some countries like Japan, Korea and the US. For the other countries, there shall be comparatively slower Sub-6Hz 5G compatible iPhone Pro Max in addition with the other models of iPhone 12, iPhone 12 Plus and iPhone 12 Pro. It is tested that the Sub-6Hz technology is 50% faster than the 4G technology having a reliable wide range whereas, the mm-Wave 5G is the latest and the fastest technology that even having a small range, is extremely fast having average speed of up to 1 GB per second. The Fast Company also quoted that, "If Sub-6 5G is a Camry, millimeter-wave 5G is a Mercedes S-Class."

Another shocking report which has been generated by the Fast Company is about the launch of iPhone 12 with the compatibility of 4G as the Apple Company pondered over the fact that the 5G compatibility may effect the battery life of the phone. With a variety of up-gradations including camera updates, performance enhancements, and exceptional new design, the product is decided to be released in the early next year having a price difference of at least \$200 than the 5G compatible model.

The fact that cannot be denied that the new iPhone 12 release shall result topnotch having as much capabilities as are expected by the Apple customers. This could be really very surprising to see after the product's release especially in a condition where the release date of the smartphone is continuously going further.
