

Reasons Why You Should Not Get a Tattoo

Tattoos or the Body Paints were once very popular among the people around the world. Instead of the term Tattoo, people nowadays are using a new label “ink”. They were considered to be a trademark for the youngsters especially for the fitness freaks and body-builders. For now if we see, Tattoos are slowly losing their popularity due to some reasons. We are keen to discuss some of the causes that a person should avoid getting tattoos:

- **It Has Been Too Common Now:**

Tattoos are very common nowadays. There was a time when Tattoos were hardly seen to be applied and there were less number of tattoo shops nationwide. Only the men having stylish and build-up body preferred to apply tattoos on their arms and chests. Time to time, as the people gained interest in getting tattoos on different body parts, it became more common in the 18 years old youngsters too. Now, Tattoos are frequent that every 16 to 20 out of 100 citizen has worn it. Malls all across the country have multiple tattoo shops and the people seem to apply tattoos as a fashion.

- **Tattoos Have Lost Uniqueness:**

A Tattoo should have uniqueness and if it has any sort of a meaning or a message to convey, it is definitely a plus point. As the tattoos have become much common, day by day the uniqueness is also decreasing. People are posting pictures on Instagram with the same trending and generic tattoos. We can estimate the downfall of uniqueness through a report which clearly says that 95% to 98% tattoos posted on Instagram are just not more than generic.

- **Two Options - Expensive or Low Quality:**

From the origination of Tattoos, the expense for applying it is not compromised. Usually people think of getting cheap tattoos in order to fulfill their wish, but they ignore the quality of the tattoo as per its material as well as design. Usually you only have two options for having tattoos. Either you go for the cheap one with the compromised quality or, if you think that the thousands of dollars are just like a penny, you could then go for the expensive and alluring designs with much good and fine quality as you expect.

- **You Will Regret It Often:**

When applying tattoo on your body parts like, Arms, biceps, chest or even at the back, one should realize that if anything goes wrong, he would regret his decision after some time. This could be possible as if the content or the design is drawn through a permanent ink. The only solution of this regret would be tattoo removal. According to records of the last decade, the business of tattoo removing has frequently increased, generating revenue of over \$1 billion per year. It is now often that people wish to apply tattoos for some special occasions to display fashion and style. In these cases, people like to use the temporary inks as the tattoo has to be removed afterward.

- **Tattoos Have Limitations:**

One thing is remarkable that tattoos are now common among the people but, it is for sure that it faces workplace limitations. When you are working in a company, the employers often show negativity for the tattoo designs if you have worn one. Moreover, many organizations make such policies that regret the tattoo designing for their employees. So, it is a valid reason for avoiding tattoos and work within the organization in a united manner.

- **The Word Tattoo Seems To Be Out-dated:**

As discussed above, the term Tattoo is now considered as outdated and people are calling it “ink” instead. It has been analyzed that about 59 percent of the people use the term “ink” while talking about skin painting or making a tattoo. The word “ink” is easy to speak and elucidate the word Tattoo. Therefore, it’s more easy to say that “I am having my body inked” in a fluent way.
